SMIRJ – Stakeholders and scenario-based elements

Stakeholders:

Developers: Catch-all phrase for the programmers.

Testers: People who will be testing the software application.

Project Managers: People who will be managing the project and communicating with other stakeholders to ensure its success.

Registered Voters: These are the end users who will use the app to cast their votes.

Candidates: These are the people who are on the ballots within the software.

Local / Federal Governments: These will be the clients that will be using our software to conduct elections.

Unregistered Voters: Our software will provide links to sites where they can find out more information about registering to vote.
